

Terminology Services - Terminology and Acronyms Report

Term	Acronym	Vocabulary	Vocabulary Type	Preferred Term
total dissolved solids	TDS	Environmental Issues Terms & Acronyms	Glossary and Key Word List	
Definition: The quantity of dissolved material in a given volume of water.				
total dissolved solids	TDS	Glossary of Technical Terms: Office of Underground Storage Tanks	Glossary and Key Word List	
Total Dissolved Solids	TDS	Drinking Water Technical & Legal Terms	Glossary and Key Word List	
Definition: All of the dissolved solids in a water. TDS is measured on a sample of water that has passed through a very fine mesh filter to remove suspended solids. The water passing through the filter is evaporated and the residue represents the dissolved solids.				
Total Dissolved Solids	TDS	Underground Injection Control Glossary	Glossary and Key Word List	
Total Dissolved Solids	TDS	Terms of Environment	Glossary and Key Word List	
Definition: All material that passes the standard glass river filter; now called total filterable residue. Term is used to reflect salinity.				
Total Dissolved Solids	TDS	CADDIS Glossary	Glossary and Key Word List	
Total dissolved solids		Federal LCA Commons Elementary Flow List for Life Cycle Assessment	Glossary and Key Word List

<p>Definition: The weight of solids remaining after a well-mixed sample has been filtered through a standard glass filter and the resultant filtrate is evaporated and dried to a constant weight at 180 deg C [Original source: https://ofmpub.epa.gov/sor_internet/registry/substreg/searchandretrieve/substancesearch/search.do?details=displayDetails&selectedSubstanceId=79555].</p>				
Total Dissolved Solids	TDS	Pesticides Glossary	Glossary and Key Word List	
<p>Definition: The quantity of dissolved material in a given volume of water.</p>				
Total Dissolved Solids	TDS		Abbreviation and Acronym List	
Total dissolved solids	TDS	Glossary: Study of the Potential Impacts of Hydraulic Fracturing on Drinking Water Resources	Glossary and Key Word List	
<p>Definition: The quantity of dissolved material in a given volume of water.</p>				
Total Dissolved Solids	TDS	Underground Injection Control Terms	Glossary and Key Word List	
<p>Definition: Total dissolved solids means the total dissolved (filterable) solids present in a fluid as determined by use of the method specified in Title 40 of the Code of Federal Regulations (40 CFR) Part 136. UIC regulations protect water which has less than 10,000 milligrams per liter (mg/l) total dissolved solids. To put this value into perspective, most drinking water averages between 200 and 300 milligrams per liter total dissolved solids and water with TDS greater than 500 milligrams per liter is not recommended for human consumption. Therefore 10,000 mg/l is a very conservative value.</p>
