1. Abbas, R., and Fisher, J. W. (1997). A physiologically based pharmacokinetic model for trichloroethylene and its metabolites, chloral hydrate, trichloroacetate, dichloroacetate, trichloroethanol, and trichloroethanol glucuronide in B6C3F1 mice. Toxicology and Applied Pharmacology **137**, 15-30.

2. Abbas, R., and Hayton, W. L. (1997). A physiologically based pharmacokinetic and pharmacodynamic model for paraxon in rainbow trout. Toxicology and Applied Pharmacology **145**, 192-201.

3. Abraham, M. H., Kamlet, M. J., Taft, R. W., Doherty, R. M., and Weathershy, P. K. (1985). Solubility properties in polymers and biological media. 2. The correlation and prediction of the solubilities of nonelectrolytes in biological tissues and fluids. Journal of Medicinal Chemistry **28**, 865-870.

4. Aggarwal, G., Kohn, M. C., and Melnick, R. L. Development of a physiologically based pharmacokinetic model for isoprene. Isoprene, NTP TR 486, H -1-H-17. 2000. National Institute of Environmental Health Sciences., North Carolina. Ref Type: Report

5. Albanese, R. A., Banks, H. T., Evans, M. V., and Potter, L. K. (2002). Physiologically based pharmacokinetic models for the transport of trichloroethylene in adipose tissue. Bulletin of Mathematical Biology **64**, 97-131.

6. Ali.N, T. R. (1999). Toxicokinetic modeling of the combined exposure to Toluene and N-Hexane in Rats and Humans. J Occup Health **41**, 95-103.

7. Allen, B. C., and Fisher, J. W. (1993). Pharmacokinetic modeling of trichloroethylene and trichloroacetic acid in humans. Risk Analysis **13**, 71-86.

8. Allen, B. C., Covington, T. R., and Clewell, H. J. I. (1996). Investigation of the impact of pharmacokinetic variability and uncertainty on risks predicted with a pharmacokinetic model for chloroform. Toxicology **111**, 289-303.

9. Altman, P. L., and Dittmer, D. S. (1961). *Blood and other body fluids.* Federation of American Society for Experimental Biology, Bethesda.

10. Andersen, M. E., Krewski, D., and Withey, J. R. (1993). Physiological pharmacokinetics and cancer risk assessment. Cancer.Lett. **69**, 1-14.

11. Andersen, M. E., and Clewell, H. J. I. (1994). Gas uptake studies of deuterium isotope effects on dichloromethane metabolism in female B6C3F1 mice in vivo. Toxicology and Applied Pharmacology **128**, 158-165.

12. Andersen, M. E. (1995). Development of physiologically based pharmacokinetic and physiologically based pharmacodynamic models for applications in toxicology and risk assessment. Toxicol Lett. **79**, 35-44.

13. Andersen, M. E., Clewell, H. J. I., and Frederick, C. B. (1995). Applying si,ulation modeling to problems in toxicology and risk assessment-a short perspective. Toxicology and Applied Pharmacology **133**, 181-187.

14. Andersen, M. E., Clewell, H. J. I., Gearhart, J., Allen, B. C., and arton, H. A. (1997). Pharmacodynamic model of the rat estrus cycle in relation to endocrine disruptors. Journal of Toxicology and Environmental Health 189-209.

15. Andersen, M. E., Eklund, C. R., Mills, J. J., Barton, H. A., and Birnbaum, L. S. (1997). A multicompartment geometric model of the liver in relation to regional induction of cytochrome P450s. Toxicol.Appl.Pharmacol. **144**, 135-144.

16. Andersen, M. E., and Barton, H. A. (1999). Biological regulation of receptor-hormone complex concentrations in relation to dose-response assessments for endocrine-active compounds. Toxicol.Sci. **48**, 38-50.

17. Andersen, M. E., and Jarabek, A. M. (2001). Nasal tissue dosimetry-issues and approaches for "Category1" gases: a report on a meeting held in Research Triangle Park, NC, February 11-12, 1998. Inhal.Toxicol **13**, 415-435.

18. Andersen, M. E., and Sarangapani, R. (2001). Physiologically based clearance/Extraction models for compounds metabolized in the Nose: An example with Methyl Methacrylate. Inhal.Toxicol. **13**, 397-414.

19. Andersen, M. E., Green, T., Frederick, C. B., and Bogdanffy, M. S. (2002). Physiologically based pharmacokinetic (PBPK) models for nasal tissue dosimetry of organic esters: assessing the state-of-knowledge and risk assessment applications with methyl methacrylate and vinyl acetate. Regulatory Toxicology and Pharmacology **36**, 234-245.

20. Andersen, M. E. (2003). Toxicokinetic modeling and its applications in chemical risk assessment. Toxicol Lett. **138**, 9-27.

21. Andersen, M. E. (2004). Computer demonstration of physiological-toxicokinetic models: demonstrating a computer model that simulates the estradiol (E2)-primed LH surge during proestrus in the rat. Toxicol.Lett. **138**, 179-182.

22. Andersen, M. E., Gargas, M. L., Jones, R. A., and Jenkins, L. J. (1980). Determination of the kinetic constants for metabolism of inhaled toxicants in vivo by gas uptake measurements. Toxicology and Applied Pharmacology **54**, 100-116.

23. Andersen, M. E. (1981). Pharmacokinetics of inhaled gases and vapors. Neurobehavioral Toxicol.and Teratol. **3**, 383-389.

24. Andersen, M. E. (1981). A physiologically based toxicokinetic description of the metabolism of inhaled gases and vapors: analysis at steady state. Toxicology and Applied Pharmacology **60**, 509-526.

25. Andersen, M. E. and Clewell, H. J. III. Pharmacokinetic interaction of mixtures. Dayton, O. H. Proceedings of the 14th Annual Conference on Environmental Toxicology , 221-238. 1983. AFAMRL-TR-83-099.
Ref Type: Abstract

26. Andersen, M. E., and Keller, W. C. (1984). Toxicokinetic principles in relation to percutaneous absorption and cutaneous toxicity. In Cutaneous Toxicity (V. A. Drill, and P. Lazar, Eds.), pp. 9-27. Raven Press, New York.

27. Andersen, M. E., Clewell, H. J. I., Gargas, M. L., Smith, F. A., and Reitz, R. H. (1987). Physiologically-based pharmacokinetics and risk assessment process for methylene chloride. Toxicology and Applied Pharmacology **87**, 185-205.

28. Andersen, M. E., Gargas, M. L., Clewell, H. J. I., and Severin, K. M. (1987). Quantitative evaluation of the metabolic interaction between trichloroethylene and 1,1-dichloroethylene in vivo using gas uptake methods. Toxicology and Applied Pharmacology **89**, 149-157.

29. Andersen, M. E., MacNaughton, M. G., Clewell, H. J. I., and Paustenbach, D. J. (1987). Adjusting exposure limits for long and short exposure period using a physiological pharmacokinetic model. American Industrial Hygiene Association Journal **48**, 335-343.

30. Andersen, M. E. (1988). Quantitative risk assessment and occupational carcinogens. Applied Industrial Hygiene **3**, 267-273.

31. Andersen, M. E. (1988). Quantitative risk assessment and occupational carcinogens. Applied Industrial Hygiene **3**, 267-273.

32. Andersen, M. E. (1991). Physiological modeling of organic chemicals. Annals of Occupational Medecine **35**, 305-321.

33. Andersen, M. E., Clewell, H. J. I., and Gargas, M. L. (1991). Physiologically-based pharmacokinetic modeling with dichloromethane, its metabolite carbon monoxide and blood carboxyhemoglobin in rats and humans. Toxicology and Applied Pharmacology **108**, 14-27.
