RE: Olefins Panel Category Report for the Low Butadiene C4 Category
Under the HPV Challenge Program: HPV Registration No.

Dear Administrator Leavitt:

On August 27, 2001, the American Chemistry Council Olefins Panel (Panel) submitted a Test Plan under the High Production Volume (HPV) Chemical Challenge Program pertaining to the Low Butadiene C4 Category. Robust summaries for the one toxicology study conducted under the test plan and for modeling studies conducted for this category were submitted to EPA on December 4, 2003. With this letter, the Panel submits the Category Summary Report for the Low Butadiene C4 Category.

The Category summary report contains one CAS number, 68606-24-6, not included in the original test plan. The Panel has included this CAS number in the Low Butadiene C4 Category report because this CAS number can be used to describe a C4 Raffinate 3 stream in this category.

With the submission of this category report, the Panel has completed its obligation under the HPV Challenge Program for the Low Butadiene C4 category.

If you have any questions, please contact Elizabeth Moran, Manager of the Olefins Panel, at 301 924 2006 or Elizabeth_Moran@americanchemistry.com.

Sincerely Yours,
