Jeffrey,

Attached are the letters, revised test plans, and data summaries for three of our HPV chemicals that we discussed by phone Tuesday. I am sending a separate e-mail for five additional chemicals (files are too big for one e-mail). In summary, these are the attachments:

CAS #	Chemical Name	Included in attached documents
13472-08-7	Butanenitrile, 2,2'-azobis	Response to EPA comments, revised test plan and completed test plan and robust summary
13472-08-7	Butanenitrile, 2,2'-azobis	Algal protocol
65086-85-3	Carbamate Hydrochloride	Response to EPA comments, revised test plan
462-06-6	Fluorobenzene	Completed test plan and robust summary

Please give me a call if you have any questions regarding these submittals. I can be reached at 302-773-0910.

In addition to the submittals, the following six chemicals or categories have had HPV responsibility transferred to Invista®, a subsidiary of Koch, Inc. because we divested the businesses associated with their manufacture and use. I have attached a letter confirming this transfer of responsibility.

CAS #	Name
68411-90-5	Hexanedinitrile hydrogenated, high-boiling fraction (Crude BHMT)
124-09-4	1,6-Hexanediamine (being reviewed in the ICCA HPV program and not a formal US EPA HPV chemical), (amine heads category)
694-83-7	1,2-Cyclohexanediamine (amine heads category)
15520-10-2	2-methyl 1,5-Pentanediamine (amine heads category)
960-71-4	Triphenylborane
5419-55-6	Triisopropylborate

Best Regards,
Ed Mongan
