

## Terminology Services - Vocabulary Catalog List Detail Report

Term
Friable Asbestos
Definition: Any material containing more than one-percent asbestos, and that can be crumbled or reduced to powder by hand pressure. (May include previously non-friable material which becomes broken or damaged by mechanical force.)
Nonfriable Asbestos-Containing Materials
Definition: Any material containing more than one percent asbestos (as determined by Polarized Light Microscopy) that, when dry, cannot be crumbled, pulverized, or reduced to powder by hand pressure.
