

Terminology Services - Terminology and Acronyms Report

Term	Acronym	Vocabulary	Vocabulary Type	Preferred Term
Acceptable Risk		Safety, Health, and Environmental Management System Terms and Definitions	Glossary and Key Word List	
Definition: Risk that has been reduced to a level that can be tolerated by the organization having regard to its legal obligations and its own OH&S policy.				
acceptable risk		Thesaurus of Terms Used in Microbial Risk Assessment	Thesaurus	
Definition 1: The likelihood of suffering disease or injury that will be tolerated by an individual, group, or society. The level of risk that is determined to be acceptable may depend on a variety of issues, including scientific data, social, economic, legal, and political factors, and on the perceived benefits arising from a chemical or process. [EPA 2004]				
Definition 2: This is a risk management term. The acceptability of the risk depends on scientific data, social, economic, and political factors, and on the perceived benefits arising from exposure to an agent. [IPCS/OECD 2004]				
Acceptable Risk		EPA EV-Outcomes-Risk Assessments	Taxonomy	
Definition 1: The level of potential losses that a society or community considers acceptable given existing social, economic, political, cultural, technical and environmental conditions. Comment: In engineering terms, acceptable risk is also used to assess and define the structural and non-structural measures that are needed in order to reduce possible harm to people, property, services and systems to a chosen tolerated level, according to codes or "accepted practice" which are based on known probabilities of hazards and other factors. [United Nations International Strategy for Disaster Reduction Terminology]				
Definition 2: The likelihood of suffering disease or injury that will be tolerated by an individual, group, or society. The level of risk that is determined to be acceptable may depend on a variety of issues, including scientific data, social, economic, legal, and political factors, and on the perceived benefits arising from a chemical or process. [EPA 2004][MRA Thesaurus]				
Definition 3: This is a risk management term. The acceptability of the risk depends on scientific data, social, economic, and political factors, and on the perceived benefits arising from exposure to an agent. [IPCS/OECD 2004][MRA Thesaurus]
